DC40 DVD Video Camera

Canon
advanced simplicity®

One DVD camcorder for Real Widescreen movies and 4 megapixel photos.

DVD | 4 MEGA PIXELS | 10x OPTICAL ZOOM 200x DIGITAL ZOOM | IMAGE STABILIZER | 16:9 REAL WIDE SCREEN | DiG!C DV

POWERFUL 2-IN-1 DVD CAMCORDER

Why take two cameras out with you when, with the DC40, you can shoot both high resolution movies and photos on one compact camera. Its DiG!C DV image processor, 4 Megapixel CCD image sensor and Canon 10x zoom lens deliver exceptional quality photos and movies.

CONVENIENT DVD RECORDING

Recording straight to DVD means your movies are ready to watch as soon as you get home. You can even edit your movies in-camera without a computer. Trim or delete unwanted scenes and personalise your movies by creating your own playlists all in an instant. And because your movies are on DVD they'll be easy to store and share with friends.

ONE BIG 4 MEGAPIXEL CHIP WITH THREE CLEVER COLOUR FILTERS

The massive 4 Megapixel CCD works hand-in-hand with an advanced RGB Primary Colour Filter to give your movies and photos richer, more accurate colours with amazing detail. This professional standard filter works by separating light into individual red, green and blue colour components. You'll really notice the difference in skin tones and in situations where strong colours dominate, like sunsets. Plus, the custom-built DiG!C DV image processor treats video and photos differently, making sure both are totally realistic. With such a high resolution CCD you'll also enjoy better performance in low lighting conditions.

SEE MORE WITH REAL WIDESCREEN

The DC40 lets you choose between two modes at the touch of a button: standard 4:3 mode; and Canon's high-resolution, Real Widescreen 16:9 mode, perfect for widescreen TVs. Unlike other widescreen systems that simply stretch the picture or crop the top and bottom, Canon's Real Widescreen lets you film a wider angle with no loss of quality. And the wide 2.7" LCD screen lets you see exactly what you're recording even in Real Widescreen mode.

MOVIES WITH SUPERIOR SOUND

Bring your movies to life with the superior sound quality of Dolby* Digital Stereo.

DOLBY DIGITAL STEREO CREATOR

STYLISH DESIGN WITH HANDY FEATURES

The sophisticated, curved design of the DC40 has been designed to be both comfortable and easy to operate. All the important controls are positioned on the body of the camera, so you won't waste time searching through complex menu options. Its fold out, vari-angle wide 2.7" LCD screen lets you shoot over crowds and from difficult angles while Image Stabilizer technology ensures smooth, steady footage. And there's also a motorised built-in lens cap that opens automatically when you turn the DC40 on.

STUNNING DIGITAL PHOTOGRAPHY

The DC40's photo features rival that of digital still cameras by giving you more creative control over your photography. Features include:

- 4 Megapixel CCD for photos that can be printed up to A4 in size with superb detail.
- MiniSD card slot for photos ensures fast performance.
- Advanced photographic controls include: built-in flash with red-eye reduction, selectable 9 point AiAF, Auto Exposure Bracketing, continuous shooting and special scene modes.
